

Patient Demographics Report

Age, gender and neighbourhood profile of patients

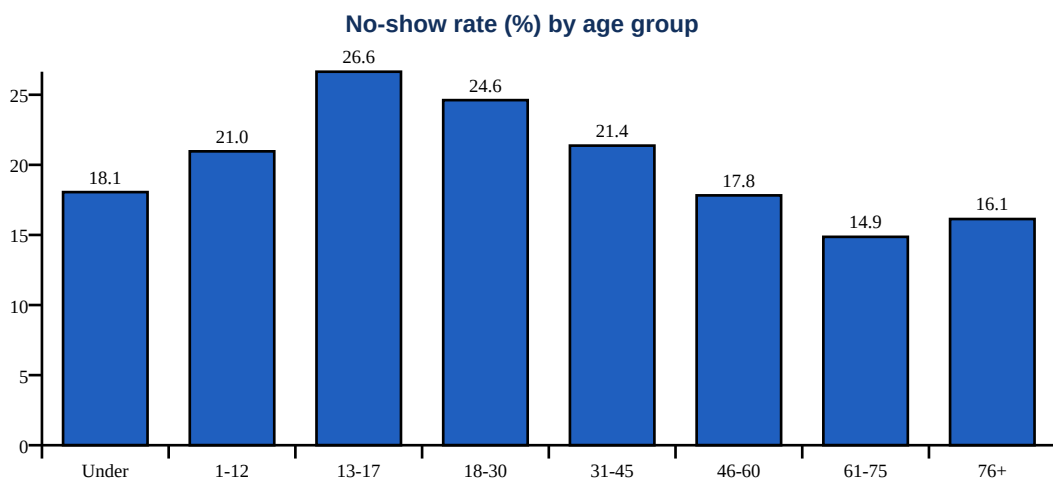

1. Summary

This report profiles the patients in the dataset by age and gender and shows where appointments took place. The 110,527 appointments cover 62,299 unique patients.

2. Age profile

Patient age ranges from 0 to 115 years. The average age is 37.1 years, the median is 37 years, and the middle 50% of appointments are for patients aged 18 to 55.

Age group	Appointments	Share of total	No-show rate
Under 1 (age 0)	3,539	3.2%	18.1%
1-12 (child)	17,497	15.8%	21.0%
13-17 (teen)	6,343	5.7%	26.6%
18-30	18,252	16.5%	24.6%
31-45	21,954	19.9%	21.4%
46-60	23,179	21.0%	17.8%
61-75	14,370	13.0%	14.9%
76+	5,392	4.9%	16.1%

Younger adults (18-30) and teenagers miss appointments most often, while patients aged 61-75 and 76+ have the lowest no-show rates. Babies and young children are brought by parents, so their attendance is better than that of teenagers.

3. Gender

Gender	Appointments	Share	No-show rate
Female	71,840	65.0%	20.3%

Gender	Appointments	Share	No-show rate
Male	38,687	35.0%	20.0%

Women make up roughly two thirds of all appointments (65.0%). The no-show rate is almost the same for women (20.3%) and men (20.0%), so gender is a weak predictor of missing an appointment.

4. Neighbourhoods with the most appointments

Rank	Neighbourhood	Appointments	Share of total
1	JARDIM CAMBURI	7,717	7.0%
2	MARIA ORTIZ	5,805	5.3%
3	RESISTÊNCIA	4,431	4.0%
4	JARDIM DA PENHA	3,877	3.5%
5	ITARARÉ	3,514	3.2%
6	CENTRO	3,334	3.0%
7	TABUAZEIRO	3,132	2.8%
8	SANTA MARTHA	3,131	2.8%
9	JESUS DE NAZARETH	2,853	2.6%
10	BONFIM	2,773	2.5%

The dataset has 81 neighbourhoods. The ten busiest account for 36.7% of all appointments. Jardim Camburi alone has 7,717 appointments, the most of any neighbourhood.

5. Patients with many appointments

Most patients appear only once. 37,920 patients (60.9% of unique patients) have exactly one appointment, and 2,617 patients have five or more appointments.
