

Bangalore Used Cars Market Report

Prices, brands, fuel, age and features of 1,481 used-car listings

1. About this dataset

This report summarises a scraped listing of **1,481 used cars for sale in Bangalore** (India). Each row is one car listing, and the source links point to the CardDekho used-car site. The original file stores most details inside four nested columns; this report reads those columns and reports the fields inside them: brand, model, variant, year, fuel, body type, kilometres driven, transmission, ownership, price, insurance, RTO code, seats, mileage, engine size, power and the list of features.

Prices are quoted in Indian rupees. **1 lakh = 100,000 rupees** and 1 crore = 100 lakh. All prices below are in lakh unless stated otherwise.

Property	Value
Listings	1,481
Brands (OEMs)	29
Models	199
Model years	1995 to 2023 (median 2017)
Median asking price	Rs 6.72 lakh
Average asking price	Rs 9.54 lakh
Price range	Rs 0.40 lakh to Rs 130.00 lakh
Typical price range (10th to 90th percentile)	Rs 3.27 lakh to Rs 17.99 lakh
Median kilometres driven	52,486

The average price (Rs 9.54 lakh) is well above the median (Rs 6.72 lakh) because a small number of luxury cars, such as the BMW X7 listed at Rs 1.30 crore, pull the average up. The median is the better guide to a typical car.

2. Price distribution

Price band	Listings	Share
Under Rs 5 lakh	400	27.0%
Rs 5 - 10 lakh	698	47.1%
Rs 10 - 20 lakh	256	17.3%
Rs 20 lakh and above	127	8.6%

Almost half of all listings (47.1%) are priced between Rs 5 and 10 lakh. Only 8.6% are priced at Rs 20 lakh or more.

3. Brands and models

Most listed brands

Brand	Listings	Share	Median price (lakh)
Maruti	373	25.2%	5.39
Hyundai	313	21.1%	6.05
Honda	137	9.3%	6.94
Mahindra	77	5.2%	9.85
Tata	67	4.5%	6.90
Renault	67	4.5%	6.25
Ford	61	4.1%	6.89
Volkswagen	60	4.1%	7.65
Toyota	53	3.6%	11.25
Mercedes-Benz	41	2.8%	32.00

Maruti (373 listings) and Hyundai (313) together make up 46.3% of the market in this dataset.

Most listed models

Model	Listings	Median price (lakh)
Maruti Swift	95	5.48
Hyundai i20	83	6.25
Hyundai Grand i10	61	5.49
Honda City	60	7.62
Maruti Baleno	58	6.96
Honda Jazz	39	6.45
Mahindra XUV500	37	10.30
Maruti Swift Dzire	35	6.08
Ford Ecosport	35	7.92
Maruti Celerio	35	4.64

Brands by median price (brands with at least 20 listings, cheapest first)

Brand	Listings	Median price (lakh)
Maruti	373	5.39
Hyundai	313	6.05
Renault	67	6.25
Ford	61	6.89
Tata	67	6.90
Honda	137	6.94
Skoda	37	6.95
Volkswagen	60	7.65
Mahindra	77	9.85
Toyota	53	11.25
Kia	27	15.40
Jeep	20	18.49
Audi	24	20.95
BMW	38	27.75
Mercedes-Benz	41	32.00

Maruti has the lowest median price (Rs 5.39 lakh) and Mercedes-Benz the highest (Rs 32.00 lakh), followed by BMW (Rs 27.75 lakh) and Audi (Rs 20.95 lakh).

Models by median price (models with at least 15 listings; lowest five and highest five)

Model	Listings	Median price (lakh)
Hyundai i10	28	3.00
Honda Brio	15	3.51
Maruti Alto 800	16	3.91
Maruti Wagon R	31	4.02
Maruti Celerio	35	4.64
Tata Nexon	16	10.88
Hyundai Creta	30	11.47
Hyundai Venue	21	11.50
Kia Seltos	17	15.90
Jeep Compass	19	17.99

4. Fuel, transmission, body type and owners

Fuel	Listings	Share	Median price (lakh)
Petrol	1,003	67.7%	6.20
Diesel	464	31.3%	9.00
Cng	6	0.4%	3.60
Electric	6	0.4%	11.50
Lpg	2	0.1%	2.92

Petrol cars are about two thirds of listings and diesel about one third. CNG, electric and LPG cars together are only 14 listings, so their medians are based on very few cars.

Transmission	Listings	Share	Median price (lakh)
Automatic	468	31.6%	10.35
Manual	1,013	68.4%	5.90

Automatic cars are 31.6% of listings and have a median price of Rs 10.35 lakh, compared with Rs 5.90 lakh for manual cars.

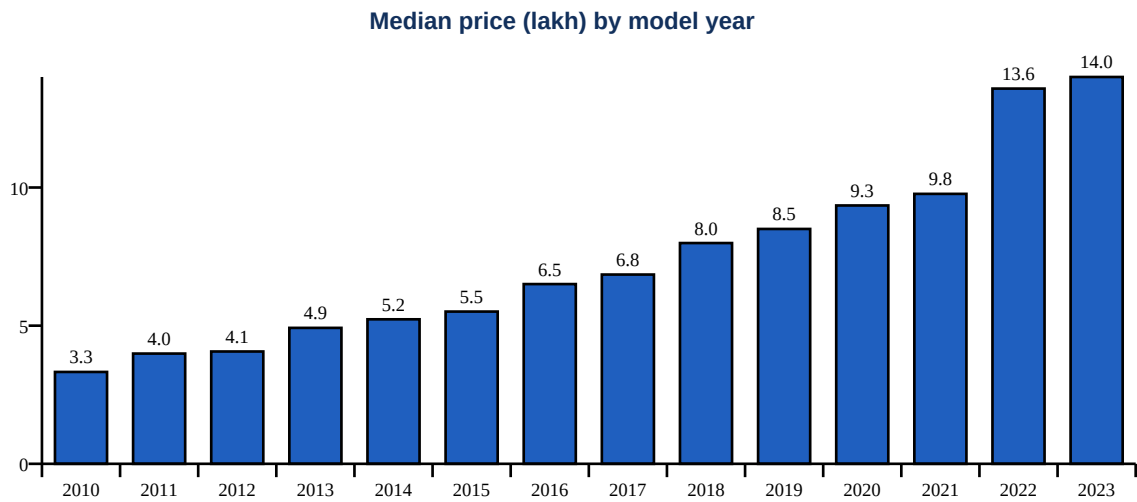

Body type	Listings	Share	Median price (lakh)
Hatchback	673	45.4%	5.25
SUV	409	27.6%	11.75
Sedan	337	22.8%	7.00
MUV	51	3.4%	9.65
Minivans	8	0.5%	4.60
Coupe	1	0.1%	9.00
Convertibles	1	0.1%	34.95
Pickup Trucks	1	0.1%	7.49

Hatchbacks are the largest group (45.4%), then SUVs and sedans. SUVs have the highest median price among the common body types (Rs 11.75 lakh).

Ownership	Listings	Share	Median price (lakh)
1st Owner	893	60.3%	7.40
2nd Owner	460	31.1%	6.25
3rd Owner	95	6.4%	3.90
4th Owner	25	1.7%	3.75
5th Owner	8	0.5%	2.27

Price falls with each additional owner: first-owner cars have a median of Rs 7.40 lakh and third-owner cars Rs 3.90 lakh.

5. Age, kilometres and price

Model year	Listings	Median price (lakh)	Median km driven
2010	46	3.33	90,000
2012	72	4.06	86,282
2014	96	5.23	74,000
2016	176	6.50	60,000
2018	178	7.99	46,250
2020	105	9.35	30,535
2022	85	13.58	16,962

Newer cars cost more and have fewer kilometres on them. The median 2012 car costs Rs 4.06 lakh with 86,282 km driven, while the median 2022 car costs Rs 13.58 lakh with 16,962 km.

What relates most to price? Correlation with price: engine power 0.77, engine size 0.56, model year 0.35 and kilometres driven -0.20. Power has by far the strongest link: more powerful cars cost more. Kilometres driven has only a weak negative link on its own, because kilometres are tied up with the age and type of the car.

6. Features, insurance and registration

Feature	Listings with it	Share
Anti Lock Braking System	1,262	85.2%
Keyless Entry	1,245	84.1%
Bluetooth	1,046	70.6%
Alloy Wheels	882	59.6%
Touch Screen	643	43.4%
Rear Camera	631	42.6%
Navigation System	506	34.2%
Cruise Control	470	31.7%

Safety and basics such as ABS and keyless entry are common, while cruise control and navigation appear in under a third of listings.

Insurance type	Listings
Third Party	816
Comprehensive	595
Zero Dep	60
Not Available	5

The most common Bangalore RTO (registration office) codes are KA03 (238), KA05 (182), KA51 (155), KA01 (154), KA04 (132).

7. Data quality notes

- Prices were stored as text such as "Rs 6.50 Lakh" and "Rs 58,000"; they were converted to lakh for this report.
- Kilometres are written in the Indian digit-grouping style (for example 1,20,000) and were converted to plain numbers.
- RTO code is missing for 168 listings, mileage for 42, and power and torque for 16.
- Electric cars have no real engine size (shown as 0 CC) and the two Mahindra e2o Plus listings give 110 and 140 "kmpl", which is a driving range rather than fuel economy. Mileage figures should be read for petrol, diesel and CNG cars only.
- Insurance has a few stray values ("1" and "2") and two spellings of third-party cover, which were merged here.
- Seven listings are priced at Rs 60 lakh or more and 17 are priced under Rs 1 lakh (mostly cars from 1998 to 2011), so the extremes are real but rare.
- Each listing has a unique link, so there are no duplicate listings, although the same car model appears many times.

8. Key takeaways

- The typical used car here costs about Rs 6.72 lakh, Maruti and Hyundai together account for almost half of the listings, and hatchbacks are the largest body type.
- Engine power, model year and body type are the main drivers of price; luxury brands sit far above the rest.
- Automatic and diesel cars are priced higher than manual and petrol cars.
- Each extra owner lowers the median price, and newer cars with fewer kilometres cost more.
